

The PHILIPPINE POPULATION REVIEW (PPR) is the official journal of the Philippine Population Association (<http://ppaphils.blogspot.com>) and is published annually. A peer-reviewed journal, PPR is listed in the Philippines Journal Online (<http://www.philjol.info>) and Ulrich's Periodicals Directory (<http://www.ulrichsweb.com>).

PPR seeks to strengthen the evidence-based discourse of population issues confronting the national, international and global communities. It provides a forum for the conceptual, methodological and empirical quantitative and qualitative analyses of the vital events of human population—fertility, mortality, morbidity and migration—including their movements, interrelationships, complexities, consequences and impact. Its scientific information base is expected to help improve population and population-related policies, programs, teaching and research, towards enhancing the quality of life and well being of all.
