The Southeast Asian Regional Center for Graduate Study and Research in Agriculture (SEARCA) is the center of excellence in agriculture of the Southeast Asian Ministers of Education Organization (SEAMEO), an intergovernmental body founded in 1965 to promote regional cooperation in education, science, and culture. SEARCA's mandate is to strengthen institutional capacities in agricultural and rural development in Southeast Asia through graduate education, short-term training, research, and knowledge management.

The Philippine Rice Research Institute (PhilRice), an attached agency of the Department of Agriculture, is the national lead agency for the planning, coordination, implementation, and monitoring of all rice research and development activities in the Philippines.

The Bureau of Agricultural Research (BAR), a line agency of the Department of Agriculture, is mandated to ensure that agricultural research be coordinated and undertaken for maximum utility to agriculture. The Bureau taps farmers, farmers' organizations, and research institutions, especially state colleges and universities, in the conduct of research for use by the Department of Agriculture of the Philippines and its clientele.
