EDITORIAL

From one generation to another

Jean-Christophe Gaillard*

This issue of the *Philippine Geographical Journal* (PGJ) marks the transition towards a new phase in the quality of its content and style.

The PGJ has been the academic journal of the Philippine Geographical Society (PGS) since 1953. It has gained fame in the Philippines and abroad for the quality and diversity of the papers published in its pages. Lately, however, the journal passed through a difficult period, encountering intermittently some problems that slowed down its development. To revive the PGJ and bring it up to new achievements, a new editorial policy has been set.

Twice a year, the PGJ will hitherto publish original articles reporting theoretical and empirical researches of both physical and human geographical interest and also dealing with the Philippines and other tropical countries. The PGJ will welcome contributions from geographers as well as other scholars from the humanities, social sciences and environmental sciences. The PGJ will also carry "flashbacks" (old papers published in the PGJ but of present interest to contemporary Filipinists), book reviews, field reports and PGS news. It will regularly come up with special issues around specific topics to be developed by a selected group of authors. But the most significant evolution in the format of the PGJ will be that all manuscripts submitted to the journal will henceforth be peer-reviewed by two referees (one Filipino and one foreigner) before publication. These measures should enhance further the quality of the journal and give it a refereed status.

The revival of the PGJ as a peer-reviewed journal is the initiative of a new set of board members. The new board of directors includes:

Editor:

Jean-Christophe Gaillard, Ph.D., Université Joseph Fourier – Grenoble I, France

Associate Editors:

Meliton B. Juanico, M.S., University of the Philippines Diliman

Arnisson Andre C. Ortega, M.A., University of the Philippines Diliman

Referees:

Philippe Audra, Ph.D., Université de Nice – Sophia Antipolis, France

Greg Bankoff, Ph.D., University of Auckland, New Zealand

Francisco G. Delfin Jr., Ph.D., University of the Philippines Diliman

Victoria O. Espaldon, Ph.D., University of the Philippines Diliman

Philip Kelly, Ph.D., University of York, Canada

David Kummer, Ph.D., State Univ. of New York - Westchester Community College

Yannick Lageat, Ph.D., Université de Bretagne Occidentale, France

Iwan Le Berre, Ph.D., Université de Bretagne Occidentale, France

Rosa T. Perez, Ph.D., PAGASA, Philippines

Lorraine C. Salazar, Ph.D., University of the Philippines Diliman

Fernando P. Siringan, Ph.D., University of the Philippines Diliman

Doracie Zoleta-Nantes, Ph.D., University of the Philippines Diliman

To mark the transition from the older format, the editorial team has decided to publish an overall index of all papers published since 1953 as well as a list of all contributing authors.

Mabuhay ang PGJ!

Information for Contributors

The *Philippine Geographical Journal* was instituted in 1953 to serve: as an outlet for scholarly articles ranging from geographical/spatial to socioeconomic topics particularly on the Philippines and other Third World countries; as a medium for the expression of professional opinions; and as a journal for reports on activities of the Philippine Geographical Society and other items of relevance to the geographic discipline. Its volumes sometimes contain advertisement of interest to the geographic profession and certain items. All manuscripts submitted for publication should conform to the following requirements:

Format and length. Manuscripts should be typewritten, double-spaced and use only one side of an 8 ½ x 11 inch-bond paper. Computer printouts are accepted provided they are legible. More preferably, we welcome the sending of an accompanying diskette or CD copy of the article. Because of rising mail costs, rejected manuscripts will not be returned. Scholarly articles should range from 2000 to 5000 words while reviews, reports, news and special items should be less than 2000 words. The editors reserve the right to stylistically edit articles and to reduce the length of reports, news and special items that they consider to be unnecessarily long or of little interest to readers.

Author's affiliations and interests. Authors should supply, through a footnote on the first page of the title page of the article manuscript, information on their current employment (position/rank, institution/organization, address), educational attainment (degree, discipline, institution), and research interests and experience. If a manuscript has been presented as a paper in a conference, workshop or symposium, the particulars of the occasion should be footnoted too.

Abstract. On the first page of the article manuscript between the author's name and the text, an abstract with a length ranging from 100 to 200 words should be included. It should summarize salient points and include key words.

References and footnotes. All words cited in the text in parenthesis (author, year, page) should be listed at the end of the article in alphabetical order, last name first following the bibliographic format used in recent issues of the Journal. Comments and explanations on textual content should be placed as footnotes, indicated consecutively throughout the manuscript by numerical superscripts, and may include literature citations.

Illustrations and tables. Illustrations, which should be kept to a minimum, should be of professional quality drawn in black ink on white paper or in thick tracing paper. They should not be more than two times nor smaller than the size of the manuscript paper. The style of the lettering should be either in Leroy or Arial type/font. Figure numbers and captions should be indicated in pencil at the bottom of the paper way below the drawing of its borderline. As with other aspects of style, the format of the table should follow that indicated in recent issues of the Journal.

Other guidelines and information. An article manuscript will be accepted on the understanding that it has not been submitted elsewhere and will not be until a decision has been rendered by the Journal the Journal's decision will be made known within one month after receipt of the manuscript. Each author will receive five copies of the Journal. All materials submitted for publication should be addressed to:
